OF REVENUE for 1911-12 and 1912-13.

General causes of Increase or Decrease above £ 100.

Attributable chiefly to reduced consumption of spirits and local manufacture of liquors, less rum imported for the Navy Service, falling off in the importation of cattle due, partly, to disturbed conditions in the countries usually supplying this article and partly to the arrival of a cargo of frozen meat immediately after the closing of the financial year; also to less importation of petroleum owing to high prices prevailing during the year, and to smaller importation of leaf tobacco on account of the large stock of duty paid tobacco existing at the close of 1911-12. There was an appreciable increase in the importation of wheat, flour and wine due respectively to increase in the local milling of wheat for exportation, convenient prices of flour and discontinuance of locally manufactured artificial wine.

Due to decrease in quarantine dues attributable to the imposition of quarantine restrictions on arrivals from infected countries in 1911-12. Under tonnage dues there was an increase of £ 1,304 due to the larger number of steamers calling at this port, the prices of coals in Malta being cheaper than in the neighbouring ports.

Due chiefly to extraordinary fines inflicted by the Superior Courts in 1911-12 and to smaller amount received for fines inflicted by the Judicial Police Courts in 1912-13.

Due chiefly to a decrease in the importance of the cases dealt with in the Superior Courts.

Due to increase in sale of stamps and in number of surcharged correspondence received, and to larger commission received on money orders paid.

Due to lighter traffic and to receipt in 1911-12 of proceeds of sale of unserviceable stores.

Due principally to heavier consumption of water by the Naval Departments and private consumers generally.

Due chiefly to the substitution of metallic filament for carbon filament lamps in Streets and War Department buildings; smaller consumption of current by cinematographs and fewer additional services laid in 1912-13.

Due mainly to payment of arrears of previous years.

Due principally to sale of securities in 1912-13 and to larger profit realized by the Savings Bank in 1911-12 owing to the fact that income tax was refunded in that year on dividends received for the preceding two years.

Due chiefly to receipt in 1911-12 of proceeds of sale of dutiable goods under Customs Ordinance VII of 1909, and of fees on licences to lay tunny nets and to smaller value of Water Works Stores issued in 1912-13.

OF EXPENDITURE for 1911-12 and 1912-13.

General causes of Increase or Decrease above £ 100.

Due to refund of income tax in 1912-13 on dividends received in 1911-12 on Savings Bank Investments owing to which more interest was paid to the Bank ; to payment towards Depreciation Fund "A" and to loss on sales of Colonial Securities.

Due to superannuation of some officers drawing high salaries, more gratuities granted and smaller number of deaths amongst pensioners than in 1911-12.

Due principally to the appointment of fewer commissioners in the election held in 1912 owing to several Districts remaining uncontested ; to re-organization of the establishment, and to the fact that there was only one Unofficial Member of the Executive Council during a portion of 1912-13.

Decrease chiefly due to re-organization of Establishment, and smaller expenditure on Postages, Telegrams, Transport and Stationery.

Due to smaller expenditure in 1912-13 on advertisements in English papers ; legal fees in cases of expropriation not provided for in special votes ; legal expenses for the recovery of revenue and purchase of Revenue Stamps, and to the fact that no supply of Savings Bank pass books was required during the year.

Decrease due principally to less quarantine restrictions and consequent decrease in the expenditure on extra assistance ; smaller expenditure on maintenance of vessels and to purchase of motor boats in 1911-12.

Due chiefly to less over-time work performed and less quantity of type purchased.

Due principally to more appointments vacant and less expenditure on renewals than in 1911-12.

Fewer exploration works carried out and fewer purchases of objects of antiquity during the year.

Due mainly to appointments of a Magistrate and a Registrar vacant during a portion of the year ; transfer of clerks drawing lower salaries ; less expenditure on Interpretations and Professional Attendance and on expenses of Inquests, and to purchase of furniture for the Public Registry in 1911-12.

Decrease due principally to vacancies in the ranks, non supply of blankets, appointment of Instructors vacant, less remounts and bicycles purchased, and economy on lighting and transport expenses.

Due to extraordinary expenses incurred in 1911-12 owing to prevalence of cholera.

Increase due to supply of blankets, more expenditure on rations and fuel owing to an increase in the population of the Prison, and greater quantity of stone blocks purchased in 1912-13.

Suppression of appointments consequent on the transfer of the Seamen's Hospital to the Zammit Clapp Hospital in August 1911 ; retirements of District Medical Officers and appointments at a lower rate of salary ; less expenditure on uniforms owing to a stock of blue serge remaining available out of the supply in 1911-12 ; decreased expenditure on transport by District Medical Officers and on funerals of paupers ; and less expenditure on Drugs, owing to diminution of alcoholic beverages as stimulants, and introduction in certain cases of cheaper chemical preparations of equivalent effect ; to general retrenchments ; and larger expenditure incurred for the Manoel Hospital in 1911-12, owing to the outbreak of cholera and scarlet fever.

Attributable principally to provisional arrangements made in connection with certain vacant appointments of Teachers in the Lyceum and Secondary Schools ; appointments vacant during a portion of the year ; transfer of Inspector of Elementary Schools to another Department and appointment of an Acting Inspector at half the initial salary ; retirements and deaths of Teachers, and appointments and promotions at initial salaries ; non supply of dual desks within the year ; less expenditure on several sub-heads owing to retrenchments ; and payment in 1911-12 of grants to the first students in Medicine and Engineering and Architecture.

Retirement of a fourth class messenger ; reduction of the vote for purchase of books and purchase of furniture in 1911-12.

Due to absence of the Post Master General on half pay and appointments vacant during a portion of the year ; smaller supply of stamps, reduction in the rate of commission paid to Stamp Agents ; and economies effected on several sub-heads.

OF EXPENDITURE for 1911-12 and 1912-13—(cont.)

General causes of Increase or Decrease above £ 100.

Discontinuance from 1st October 1912 of contribution in aid of the Military Service.

Due to less expenditure on the Government Experimental Farm and to decrease in the extraordinary expenditure in connection with the destruction of the "Fluted Scale Insect".

Due mainly to decrease in the drawback paid to the Imperial Government and in the amount refunded for revenue overpaid; decrease in the expenditure on maintenance and repatriation of distressed Maltese abroad and on Sundry Charges; discontinuance of the Fire Insurance on the Theatre Royal, and to special expenditure in 1911-12 in connection with the Coronation festivities, the refugees from Tripoli, the Royal visit and the taking of the Census for 1911.

Due to vacant appointments.

Due to appointments vacant during a portion of the year ; decrease in applications for installations of water services and electric lighting ; less water meters purchased ; and to payment in 1911-12 for cost of providing and erecting a steam alternator and switchboard at the Electric Light Central Station.

Due to retrenchments. Only unavoidable works were carried out.

Less work in 1912-13.

COURSE OF EXCHANGE.

FOR THE YEAR 1912-13.

Exchange—Rates of exchange for cheques and bills on London in the course of the year remained nearly invariable.

Since the abolition of the ad valorem duty on 3 d/s bills, by the English Stamp Act, there has been no difference in the exchange between cheques and 3 d/s bills.

C O I N S.

Pursuant to an Order of Her Majesty in Council of the 24th September 1886, British Coins are the only legal tender in these Islands and the limit up to which Silver and Bronze Coins are received is raised to five pounds and one shilling respectively.

Twenty franc pieces and five franc pieces, both French and Italian, are now merely kept in deposit as articles of merchandize for exportation to the neighbouring centre of Trade such as Tunis, Tripoli, Bengasi, Syria and Sicily, when a demand arises for them for the purchase of produce, or for the payment of bills payable in Francs or Italian currency.

The currency consists of British gold and silver:—gold coin below legal tender weight is rejected. The system of making payments by cheques has been adopted by the whole Commercial community.

In February 1904 the Government made arrangements for the deposit of public moneys in the Anglo-Egyptian Bank, Ltd., Malta Branch.

C I R C U L A T I O N.

The British gold coin held in Malta fluctuates according to the sums imported and exported and the requirements of the Fleet. It is at present roughly estimated at

Sovereigns	£ 450,000
Half-Sovereigns	10,000
			Total	£ 460,000
British silver and bronze coin	20,000
			Specie	£ 480,000

The amount of note circulation, which is restricted to the notes of the Anglo-Maltese Bank and the Banco di Malta, cannot be ascertained, inasmuch as these Banks do not publish their accounts and they are not subject to any statutory control.

ACCOUNTS KEPT.

By Government in Sterling.

By Commerce likewise in Sterling. A few merchants, however, of the Marina and Casals (villages) still continue to keep their accounts according to the old style in Scudi, Tarl and Grains :

One Maltese Scudo is generally reckoned at 1/8.

A Tarì „ „ -/I $\frac{2}{3}$.

A Grain " " -/O)¹/₂.

Twelve Maltese Scudi are „ 20/- or £ 1 Sterling.

The Maltese coins have been demonetized : Coins to the nominal value of about £ 12,000 were withdrawn from circulation in November 1886.

Rate of exchange of British and Maltese Coins, in terms of Proclamation No. 1 of 10th March 1851.

RETURN OF GAOLS, &c.—(*continued*).**Corradino Prison.***Questions.**Answers.*

I. If the Prison is on a separate system, is the separation complete? And if not, what is the separation enforced by day and night respectively?

The Prison is on the mixed cellular system as regards the criminal ward. The separation is complete as regards prisoners undergoing hard labour of the first class for the first twenty-eight days — After this period, prisoners are employed on hard labour of the second class, in association as far as practicable.

II. If not on the separate system, what provision is there for the supervision of the prisoners while in association?

The prisoners while in association, are supervised by Warders in the Male Division, and by Sisters of Charity in the Female Ward.

III. How many cells are there and how many wards?

There are 264 separate cells, and eight wards.

IV. Taking the average number of prisoners in gaol, how many cubic feet of space are there for each prisoner during the hours of sleep?

In the Criminal wards there are 1,120 cubic feet of space for each prisoner in 78 cells, and 1,260 cubic feet in 186 cells.

V. How are the prisoners classified?

Long sentence prisoners are sub-divided into three grades, viz: — lower, middle and upper — six months good conduct being required before passing to the middle grade, and three months to the upper grade.

RETURN OF GAOLS, &c.—(*continued*).Corradino Prison—(*continued*).*Questions.**Answers.*

VI. Is penal labour — that is labour by treadmill, crank or shot drill — in force?

No.

VII. If so, during what period of imprisonment, in respect of what classes of prisoners and during how many hours, is such penal labour enforced? In stating hours of treadwheel labour, give, first, the total time on and off at the wheel, &c., secondly, the length of spells and interval of rest.

See Answer No. VI.

VIII. What kind of labour, other than penal labour, is in use?

Building, stone-cutting, carpentering, glazing, mining, painting, staining, whitewashing, tailoring, shoemaking, mat and broom-making, gardening, field labour and stone-breaking, washing, sewing, knitting, patching, &c.

IX. If the prisoners are employed beyond the walls of the gaol, state :

1. On what kind of work are they so employed?

2. How are they supervised?

3. How many escapes of prisoners, while being employed beyond the gaol, have taken place during each of the last three years?

4. How are the profits of their labour accounted for?

The prisoners are not employed outside the prison as a rule; but well conducted men, supervised by a warder, are sent out to cultivate the lands annexed to the Prison.

None.

X. What was the total annual cost of the Prison during the financial year 1912-13?

Lodged in the Colonial Treasury.

£ 5,743. 14. 0.

One Resident Roman Catholic Chaplain; and the visiting Chaplains, one Church of England, one Presbyterian and one Wesleyan.

XV. Are religious services regularly, or otherwise performed for the benefit of the prisoners of any, and if any, what religious persuasion?

There are two Chapels, viz: one Catholic and the other Protestant in which Divine service is regularly performed.

XVI. Are Roman Catholic Priests and dissenting Ministers allowed free access to prisoners of their own persuasion? and are they informed when prisoners of their respective persuasion enter the prison?

Yes.

XVII. What provision is made for the education of prisoners?

The resident Chaplain is also Schoolmaster, and teaches religious instruction to the prisoners in their cells. He also teaches reading and writing, &c., to such prisoners as wish it.

Corradino Prison—(*continued*).*Questions.**Answers.*

XVIII. On what conditions are remissions of imprisonment granted?

Long-sentence prisoners may earn remission of sentence by industry accompanied by good conduct according to the mark system.

XIX. Have Coroner's Inquests been held on every occasion of a death in prison during the year and what were the verdicts?

One prisoner was executed. Another died of Pneumonia in the Prison Infirmary. On both cases a Magisterial enquiry was held.

XX. (1). What was the sanitary state of the Prison during the year?

Very good.

(2). What were the prevailing diseases?

Gastric disorders and slight rheumatic pains.

XXI. What are shortly the rules as to diet?

Simple Imprisonment.

$\frac{1}{2}$ Pint coffee—24 oz. bread—Soup—2 oz. salt-fish or cheese or $\frac{1}{20}$ mond. olives.
Salt-fish—or olives—or cheese—is given on Mondays, Wednesdays, Fridays and Saturdays, 4 oz beef or pork on Sundays, Tuesdays and Thursdays.

Hard Labour.

4 oz. bread in addition to the ordinary diet on Mondays, Wednesdays, Fridays, and Saturdays.

Persons during their first month of imprisonment, and persons sentenced to detention, who do not provide their own food, receive 20 oz. bread instead of 24 oz.

$\frac{1}{2}$ Pint coffee contains $\frac{1}{2}$ oz. of raw coffee and $\frac{1}{2}$ oz. sugar.

Each basin of soup contains $1\frac{1}{2}$ ration vegetables (including potatoes) $\frac{1}{100}$ pint oil or $\frac{1}{2}$ oz. suet and 0.008 mond. dry beans, lentils, etc.

A ration of vegetables is made up of 34 rot. of raw vegetables (including potatoes) for every 100 persons.

I. If the Prison is on a separate system, is the separation complete? And if not, what is the separation enforced by day and night respectively?

II. If not on the separate system, what provision is there for the supervision of the prisoners while in association?

III. How many cells are there and how many wards?

IV. Taking the average number of prisoners in gaol, how many cubic feet of space are there for each prisoner during the hours of sleep?

V. How are the prisoners classified?

Answers.

It is not on a separate system, and no effectual separation can, as a rule, be enforced either by night or by day, owing to the fact that the premises are defective and ill suited for the object for which they are intended, viz :

1. The temporary detention of prisoners, sentenced during the day, until their removal to the Corradino Prison in the afternoon.
2. The temporary detention of persons apprehended in the evening or by night until the next conveyance to the Corradino Prison.
3. The temporary detention of prisoners escorted from the Corradino Prison early in the morning to undergo trial before the Magistrates, or before H. M's. Criminal Court or to communicate with their legal adviser.
4. The detention of prisoners sentenced to not more than three days.

They are occasionally supervised, day and night, by the Keeper of the Prison and by the Inspector and Sergeants of Police on duty at the Main Station.

There are 8 cells now in use; all the others are damp, dark and insanitary.

See Answer No. I.

A classification is not practicable.

RETURN OF GAOLS, &c.—(*continued*).Valletta Lock-up—(*continued*).*Questions.**Answers.*

VI. Is penal labour — that is labour by treadmill, crank or shot drill — in force?

No penal or other labour is in force.

VII. If so, during what period of imprisonment, in respect of what classes of prisoners and during how many hours, is such penal labour enforced? In stating hours of treadwheel labour, give, first, the total time on and off at the wheel, &c., secondly, the length of spells and interval of rest.

See Answer No. VI.

VIII. What kind of labour, other than penal labour, is in use?

See Answer No. VI.

IX. If the prisoners are employed beyond the walls of the gaol, state :

1. On what kind of work are they so employed?
2. How are they supervised?
3. How many escapes of prisoners, while being employed beyond the gaol, have taken place during each of the last three years?
4. How are the profits of their labour accounted for?

1. Washing and sweeping the cells.
2. By the Prison Keeper.
3. None. Prisoners are never employed beyond the gaol.
4. Prisoners are never employed on remunerative labour.

X. What was the total annual cost of the Prison during the financial year 1912-13?

The total annual cost in 1912-13 was :

Salary to Keeper (a Police Sergeant)	...	£	51	14	2
Personal allowance	13	13	9
Fatiguesman	22	16	3

XI. What was the annual account of the Prisoners' earnings during the year 1912-13?

See Answer No. VI.

XII. What is the number of the hours allotted for sleep? And, if sleep is in association, are the dormitories lighted; and how often are they patrolled during the night?

There is no limited time for sleep.

There are no dormitories, but cells only, receiving light from the Prison yards. The cells are visited as stated in Answer No. II.

XIII. What were the number and nature of the punishments inflicted for offences committed by prisoners undergoing imprisonment?

None.

XIV. Is there, or are there, any Chaplain or Chaplains of any, and what religious persuasion?

There is a Roman Catholic Priest who performs Divine Service on Sundays and other holy days when required.

XV. Are religious services regularly, or otherwise performed for the benefit of the prisoners of any, and if any, what religious persuasion?

See Answer No. XIV.

XVI. Are Roman Catholic Priests and dissenting Ministers allowed free access to prisoners of their own persuasion? and are they informed when prisoners of their respective persuasion enter the prison?

Clergymen of every religious persuasion have free access to the prisoners, when the latter require their assistance.

XVII. What provision is made for the education of prisoners?

None.

RETURN OF GAOLS, &c.—(*continued*).**Valletta Lock-up**—(*continued*).*Questions.**Answers.*

XVIII. On what conditions are remissions of imprisonment granted?

Remissions of imprisonment are granted or withheld by His Excellency the Governor after enquiries into the circumstances connected with each case.

XIX. Have Coroner's Inquests been held on every occasion of a death in prison during the year and what were the verdicts?

No deaths occurred in 1912-13.

XX. (1). What was the sanitary state of the Prison during the year?

Fair.

(2). What were the prevailing diseases?

None.

XXI. What are shortly the rules as to diet?

Detention prisoners who have no means, and all others who are undergoing punishment are fed at the public expense by rations supplied from the Orphan Asylum on requisition by the Superintendent of Police. A day's ration consists of:

- 20 oz. bread;
- 4 oz. *pasta* made into soup with oil and vegetables; and
- 2 oz. of cheese,
- or
- 2 oz. of salt fish,
- $\frac{1}{10}$ of *mondello* olives.

RETURN OF GAOLS, &c.—(*continued*).**Gozo Prison.***Questions.*

I. If the Prison is on a separate system, is the separation complete? And if not, what is the separation enforced by day and night respectively?

Answers.

It is not on a separate system, but the premises admit, generally, of the separation of persons sentenced to imprisonment from others who are under examination or remitted for trial.

II. If not on the separate system, what provision is there for the supervision of the prisoners while in association?

They are occasionally supervised by the Keeper of the Prison, or by the Warder.

III. How many cells are there and how many wards?

There are four cells and three wards, two of which wards have airing yards.

IV. Taking the average number of prisoners in gaol, how many cubic feet of space are there for each prisoner during the hours of sleep?

The cells and yards being very spacious, and the number of persons detained in the same limited, no possible doubt can be entertained of the prisoners being too closely confined.

V. How are the prisoners classified?

See Answer to Question No. I.

HOSPITAL RETURNS, for the year 1912-1913

Central Hospital—*continued.*QUESTION II—*continued.*

(I.) What quantity of Water is available for each Patient every day?

The quantity of water is practically unlimited. There is a constant supply both of potable and second quality water.

What is the Source of Water Supply?

The potable water is conveyed from a natural spring to a storage reservoir about $4\frac{1}{2}$ miles from the town and thence by an iron main to the Hospital. The second quality water is pumped from a station about 3 miles from Valletta to a service tank whence it is distributed through iron pipes in the town.

What is the quality of the Water?

The potable water is good in every respect and the second quality water is hard.

(II.) Detail the arrangements as to Baths and Lavatories.

The Baths are Rufford and Finch's 1st Class porcelain Baths and are conveniently situated. There are seven lavatories including three lavatories in the building formerly used as Seamen's Hospital. Two are Jennings Lift-up lavatories and five are earthenware basins fixed in marble slabs. The outlet pipes of baths and lavatories discharge into gully traps in the open air and are therefore completely disconnected from the drains.

(III.) What is the system of Sewerage and what the condition of the Privies?

Water system. The privies are separated from the Wards and Corridors by means of passages thoroughly ventilated.

HOSPITAL RETURNS, for the year 1912-1913.

Central Hospital—continued.**QUESTION III.**

Number of visits of inspection paid to the Hospital during the year 1912-13.

Specifying the character of the visit in respect to Notice	And stating the Official Position of the Visitors		
	By the Governor or Colonial Secretary	By a Government Inspector (at Malta the Comptroller)	By a Committee of the Governing Body
Visit by appointment ...	Two by the Governor.	The Comptroller pays surprise visits about twice a week. The Chief Government Medical Officer visits the Hospital once a month.	Nil.

(I.) In reference to the above Table, state whether or not the Register Books were produced on every occasion; and if not, on how many occasions they were not so produced.

The Register Books are inspected by the Comptroller or his delegate.

(II.) And if on any occasion when they were examined, they were found not to be properly made up to date of examination.

The Books were found to be properly made up to date.

(III.) State also how many reports of the following kinds have come under the notice of the Governor :—

- (a) Reports of a Financial and Statistical kind, especially such as show the system on which money and Store Accounts are kept and audited.
 - (b) Reports by Person charged with the immediate management of the Hospital.
 - (c) Reports by a Government Inspector independent of the Governing Authority of the Hospital.
- (Append copies of his Reports, if any).

These queries do not apply to Malta as all Government Hospitals and Asylums are under the management of the Comptroller of Charitable Institutions, who corresponds with the Lieutenant Governor, as often as is necessary, on all questions of organization, discipline, and finance; and furnishes an annual report on the working of his Department.

Seamen's Hospital—*continued.*QUESTION II—*continued.*

(I.) What quantity of Water is available for each Patient every day?

An unlimited quantity, as the building is directly connected with the aqueducts which supply the town. The supply is constant.

What is the Source of Water Supply?

The water is conveyed from a natural spring to a storage reservoir at about 4 miles distance and thence through iron pipes by pressure.

What is the quality of the Water?

Good.

(II.) Detail the arrangements as to Baths and Lavatories.

Porcelain Baths with hot and cold water laid on, separate from the wards and from privies. Baths are all regularly trapped. Lavatories (earthenware) are attached to the wall, apart from the wards. They are trapped also.

(III.) What is the system of Sewerage and what the condition of the Privies?

The Water system. Privies are separated from the Wards; they are well laid and well trapped. Subsoil pipes (glazed earthenware) are imbedded in concrete for the whole length outside the building, and give into street interceptor.

QUESTION III.

Number of visits of inspection paid to the Hospital during the year 1912-13.

Specifying the character of the visit in respect to Notice	And stating the Official Position of the Visitors		
	By the Governor or Colonial Secretary	By a Government Inspector (at Malta the Comptroller)	By a Committee of the Governing Body
Visit by appointment ...	Nil.	The visits of the Comptroller are always sudden and take place about twice a month.	Nil.
Surprise Visit ...	Nil.	The Chief Government Medical Officer visits the Hospital once a month.	

(I.) In reference to the above Table, state whether or not the Register Books were produced on every occasion; and if not, on how many occasions they were not so produced.

The Register Books are inspected by the Comptroller or his delegates, as he is responsible for the same.

(II.) And if on any occasion when they were examined, they were found not to be properly made up to date of examination.

The Books were found to be properly made up to date of examination.

(III.) State also how many reports of the following kinds have come under the notice of the Governor :—

- (a) Reports of a Financial and Statistical kind, especially such as show the system on which money and Store Accounts are kept and audited.
 - (b) Reports by Person charged with the immediate management of the Hospital.
 - (c) Reports by a Government Inspector independent of the Governing Authority of the Hospital.
- (Append copies of his Reports, if any).

These queries do not apply to Malta as all Government Hospitals and Asylums are under the management of the Comptroller of Charitable Institutions, who corresponds with the Lieutenant Governor, as often as is necessary, on all questions of organization, discipline, and finance; and furnishes an annual report on the working of his Department.

HOSPITAL RETURNS, for the year 1912-1913.

Manoel Hospital—*continued.*QUESTION II—*continued.*

(I.) What quantity of water is available for each patient every day?

An unlimited quantity, as the building is directly connected with the public aqueduct.

What is the source of water supply?

A natural spring.

What is the quality of the water?

Good in every respect.

(II.) Detail the arrangements as to baths and lavatories.

There are two bath rooms fitted, respectively, with a Roman cement bath and an enamelled iron bath, with hot and cold water laid on. Movable zinc baths are also used in the wards. There are two Roman cement baths in the small-pox division. As to lavatories, basins on moveable stands are used in the wards.

(III.) What is the system of sewerage and what the condition of the privies?

Water system. There are seven closets in the yard completely isolated from the wards and supplied with "Crown" basins and waste water preventers.

HOSPITAL RETURNS, for the year 1912-1913.

QUESTION III.

Number of visits of inspection paid to the Hospital during the year 1912-13.

Specifying the character of the visit in respect to Notice	And stating the Official Position of the Visitors		
	By the Governor or Colonial Secretary	By a Government Inspector (at Malta the Comptroller)	By a Committee of the Governing Body
Visit by appointment ...	Nil.	The Comptroller of Charitable Institutions visits this Hospital by surprise about once a week.	Nil.
Surprise Visit ...	One by the Governor.	The Chief Government Medical Officer visits the Hospital once a month.	

(I.) In reference to the above Table, state whether or not the Register Books were produced on every occasion; and, if not, on how many occasions they were not so produced.

The Register Books are inspected by the Comptroller or his delegates.

(II.) And if on any occasion when they were examined, they were found not to be properly made up to date of examination.

The Books were found to be properly made up to date of examination.

(III.) State also how many reports of the following kinds have come under the notice of the Governor :—

- (a) Reports of a Financial and Statistical kind, especially such as show the system on which money and Store Accounts are kept and audited.
 - (b) Reports by Person charged with the immediate management of the Hospital.
 - (c) Reports by a Government Inspector independent of the Governing Authority of the Hospital.
- (Append copies of his Reports, if any).

These queries do not apply to Malta as all Government Hospitals and Asylums are under the management of the Comptroller of Charitable Institutions, who corresponds with the Lieutenant Governor, as often as is necessary, on all questions of organization, discipline, and finance; and furnishes an annual report on the working of his Department.

Gozo Hospital for Contagious Diseases—*continued.***QUESTION II—*continued.***

(I.) What quantity of water is available for each patient every day?

Practically unlimited constant supply from the public aqueducts which supply the town of Victoria; there is also a large tank in the yard the water from which is used for house purposes.

What is the source of water supply?

Natural springs, as regards potable water. The tank collects the water from the roof.

What is the quality of the water?

Good in every respect. The water of the aqueduct is naturally filtered through rock and soil before being collected into stream and conveyed to a storage reservoir at Migiarro whence it is pumped through iron pipes.

(II.) Detail the arrangements as to baths and lavatories.

There are two bath rooms each supplied with a cement bath with hot and cold water laid on.

(III.) What is the system of sewerage and what the condition of the privies?

Water system. The drainage is communicated with the main sewer. The privies are separated from the ward and thoroughly ventilated.

Seamen's Hospital—*continued.*QUESTION II—*continued.*

(I.) What quantity of Water is available for each Patient every day?

An unlimited quantity, as the building is directly connected with the aqueducts which supply the town. The supply is constant.

What is the Source of Water Supply?

The water is conveyed from a natural spring to a storage reservoir at about 4 miles distance and thence through iron pipes by pressure.

What is the quality of the Water?

Good.

(II.) Detail the arrangements as to Baths and Lavatories.

Porcelain Baths with hot and cold water laid on, separate from the wards and from privies. Baths are all regularly trapped. Lavatories (earthenware) are attached to the wall, apart from the wards. They are trapped also.

(III.) What is the system of Sewerage and what the condition of the Privies?

The Water system. Privies are separated from the Wards; they are well laid and well trapped. Subsoil pipes (glazed earthenware) are imbedded in concrete for the whole length outside the building, and give into street interceptor.

Connaught Hospital—*continued.*QUESTION II—*continued.*

(I.) What quantity of water is available for each patient every day?

An unlimited quantity, as the building is directly connected with the aqueducts which supply the town.

What is the source of water supply?

A natural spring which is situated in the neighbourhood of the hospital.

What is the quality of the water?

Good in every respect.

(II.) Detail the arrangements as to baths and lavatories.

There are marble composition baths, one in the Male and one in the Female Division for cases of phthisis, and zinc baths for other cases. There are four lavatories (earthenware basins fixed in marble slabs) two in each Division, viz : one for cases of phthisis and another for other cases. The outlet pipes of baths and lavatories are completely disconnected from the drains, and discharge into gully traps in the open air.

(III.) What is the system of sewerage and what the condition of the privies?

Water system. The privies are separated from the wards and corridors by means of ante-rooms thoroughly ventilated.

HOSPITAL RETURNS, for the year 1912-1913.

Connaught Hospital—*continued.*

QUESTION III.

Number of visits of inspection paid to the Hospital during the year 1912-13.

Specifying the character of the visit in respect to Notice	And stating the Official Position of the Visitors		
	By the Governor or Colonial Secretary	By a Government Inspector (at Malta the Comptroller)	By a Committee of the Governing Body
Visit by appointment ...	Nil.	The Comptroller of Charitable Institutions visits this Hospital by surprise very often	Once by one of the Commissioners of Charity.
Surprise Visit ...	Nil.	The Chief Government Medical Officer visits the Hospital once a month.	

(I.) In reference to the above Table, state whether or not the Register Books were produced on every occasion; and if not, on how many occasions they were not so produced.

The Register Books are inspected by the Comptroller or his delegates.

(II.) And if on any occasion when they were examined, they were found not to be properly made up to date of examination.

The Books were found to be properly made up to date of examination.

(III.) State also how many reports of the following kinds have come under the notice of the Governor :—

- (a) Reports of a Financial and Statistical kind, especially such as show the system on which money and Store Accounts are kept and audited.
 - (b) Reports by Person charged with the immediate management of the Hospital.
 - (c) Reports by a Government Inspector independent of the Governing Authority of the Hospital.
- (Append copies of his Reports if any).

These queries do not apply to Malta as all Government Hospitals and Asylums are under the management of the Comptroller of Charitable Institutions, who corresponds with the Lieutenant Governor, as often as is necessary, on all questions of organization, discipline, and finance; and furnishes an annual report on the working of his Department.

Gozo Hospital for Contagious Diseases—continued.**QUESTION II—continued.**

(I.) What quantity of water is available for each patient every day?

Practically unlimited constant supply from the public aqueducts which supply the town of Victoria; there is also a large tank in the yard the water from which is used for house purposes.

What is the source of water supply?

Natural springs, as regards potable water. The tank collects the water from the roof.

What is the quality of the water?

Good in every respect. The water of the aqueduct is naturally filtered through rock and soil before being collected into stream and conveyed to a storage reservoir at Migiarro whence it is pumped through iron pipes.

(II.) Detail the arrangements as to baths and lavatories.

There are two bath rooms each supplied with a cement bath with hot and cold water laid on.

(III.) What is the system of sewerage and what the condition of the privies?

Water system. The drainage is communicated with the main sewer. The privies are separated from the ward and thoroughly ventilated.
